

ADT-2SD

Combining the high-speed DT-2 Drill Tap Center from HAAS with a time-saving MIDACO ADT-2SD Pallet Changer will deliver true productivity and labor savings.

PALLET CHANGE TIME IS ONLY 8 SECONDS

- Load, unload, inspect parts and setup jobs while the second pallet is in the machine
- Repeatability of $\pm 0.0001"$ (.0025mm)
- Pallet changer is fully integrated with the machine control.

Pallet Changer shown with CE Guarding

For the HAAS DT-2

MIDACO has decades of pallet changer experience in all areas of production. Every Midaco product is fully QC tested for 250,000 cycles before being released to market insuring that your system will operate at peak performance for years to come.
